# IRCAM Forum Workshops

## IRCAM FORUM WORKSHOPS

The Ircam Forum is a unique place where artists and scientists, technologies and imaginary worlds come together.

You will have the opportunity to meet IRCAM's R&D teams, to meet users, demonstrate your software, show your artistic project, take part in all the programming and organise workshops in small groups.

The Ircam Forum creates a space for developing a sustainable and collaborative community. It becomes a social event for users from all over the world and of all generations.

This year will host sessions from the international ContinuuCon conference and the SynthFest.

Next Forum Ircam Hors les murs will be in Riga-Liepaja and Taipei 2025.

# OFF-SITE VISIT TO THE INSTALLATION LAND “PROMENADE SONORE”

## — VENT | SOLEIL | PLUIE”

**Thursday 27th : 19h00 - 19h45**

The land sound artwork Promenade Sonore : Vent, Soleil, Pluie is a sonic promenade in three parts, imagined and composed by sound artist Nadine Schütz for the public space that is the Pleyel footbridge.

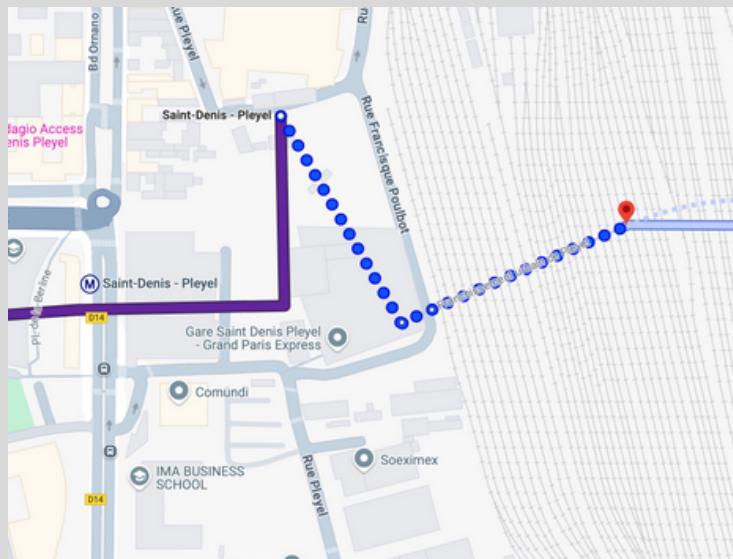

Three sculptural sound-generating instruments were created specifically for the three supporting structures, each corresponding to a meteorological element. They create a relaxing landscape ambience that varies the perception of the site's materiality, spatiality and climate. Wind, sun and rain are the musicians.

This land sound artwork results from a close collaboration between the sound architect and composer Nadine Schütz and the architect-engineer Marc Mimram. It proposes a new approach to art and music in public spaces by considering them an integral part of a place-making process. The three sound installations combine mechanical and electro-acoustic as well as pre-recorded and generative components that augment each other, thus exploring composition based on environmental interaction in different ways.
